

Brick solar lamp features

- 1 Simple**
Easy installation
- 2 Durable**
Drive over and IP68
- 3 Safe**
Regulations EN 60598-2-13
- 4 Solar Power**
Low energy consumption
- 5 Flexible**
Works on all pavings
- 6 Design**
Innovative and long-lasting design

MADE IN ITALY

An aerial photograph of a paved plaza with a herringbone pattern. Several small, rectangular solar lights are embedded in the pavement, some of which are illuminated. A group of people, including a stroller and a child, are walking across the plaza. A semi-transparent dark rectangle is overlaid on the left side of the image, containing text.

PAVING LIGHTING

EARTH[®] Brick, is an intergraded solar lamp designed for paving illumination use. It fits perfectly in the ground and its body smoothly blends with the existing natural patterns. Customised dimensions allows EARTH to easily be installed and compliment a variety of paving types.

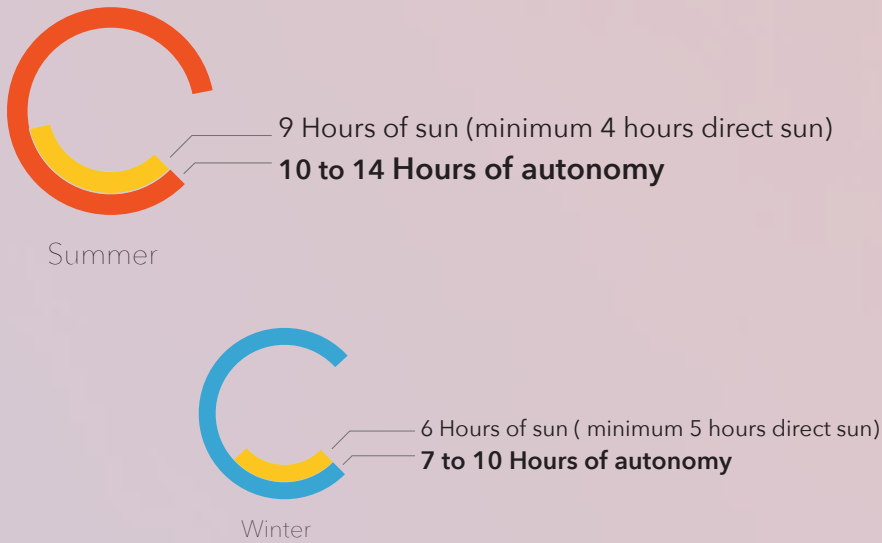

ENDLESS COMPOSITIONS

Earth[®] brick lamp is designed to perfectly fit in a variety of paving patterns worldwide, retaining the same time it's structural properties.

HIGH PERFORMANCE

Earth[®] Brick solar lamp offers an autonomy of 27 hours of light. Made by high quality aluminum and tempered glass, long lasting battery which lasts for more than 4 years.

SELF INDEPENDENCE

No connection to electricity source is required.

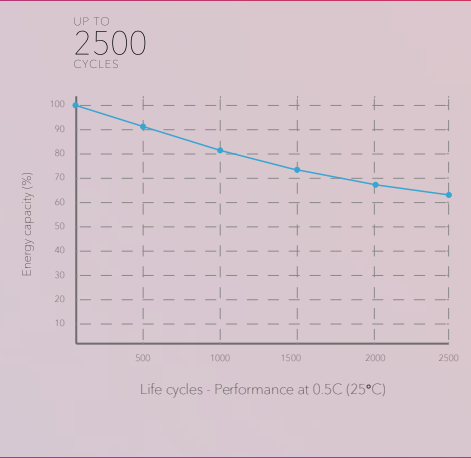

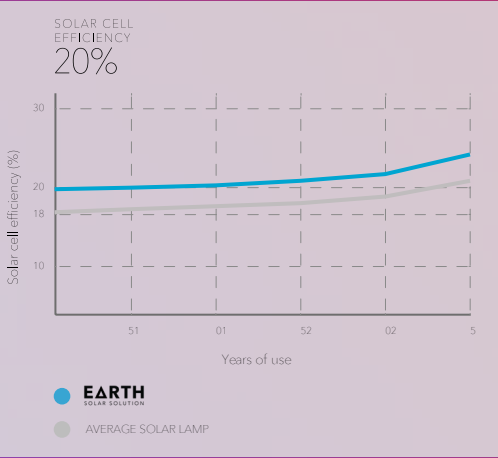

Up to 3 days without a favorable weather when battery is full charged.

Auto On / Off switch

Independent and self-sufficient light source.

ARCHITECTURAL LIGHTING

EARTH[®] Brick, is an intergraded solar lamp designed for paving illumination use. It fits perfectly in the ground and its body smoothly blends with the existing natural patterns. Customised dimensions allows EARTH[®] to easily be installed and compliment a variety of paving types.

SAFETY IS OUR PRIORITY FOR OUR CLIENTS.

Earth[®] is designed from the ground up to be the safest lamp on a paving. Much of its safety is owed to the unique aluminum body and tempered glass. Meets all the requirements of standard EN 60598-2-13 regarding vehicle and pedestrian use and are therefore ideal for lighting all the areas provided for by the regulations, such as car, parks, pedestrian zones and other designated areas.

Brick lamp specifications

Model No	E.BR.01
Weight	0.950 Kg
Material and Colour	Dark grey Anodized Aluminum and Temp. Glass
Battery type	LiFe PO4
Battery replacement	Every 5 years
Battery capacity	1 X 1.500mAh, 3.2V
Max. Load	15kN
Max. Temp	< 30 °C (cool touch)

Duration	Aprox. 13 hours
Min. charging time	Aprox. 4 to 6 hours
Dimensions	100mm x 200mm x 60-100mm (incl. base)
Solar panel output	1 Watt

LED power	0.08 watt
Lighting colour	3500 Kelvin - 4500 Kelvin
Battery Oper. Temp	-20°C ~ 80°C

Innovation in detail.
